FOR IMMEDIATE RELEASE

ORBIT INTERNATIONAL'S POWER UNIT SEGMENT  
RECEIVES \$340,000 IN NEW ORDERS

Commercial Bookings Year-to-Date Up Over 100% from Prior Year

Hauppauge, New York, April 8, 2004—Orbit International Corp. (NASDAQ:ORBT) today announced that the commercial division of its Power Units Segment, Behlman Electronics, Inc., (“Behlman”) has received new orders totaling approximately \$340,000. Deliveries under these contracts are expected to commence in the second quarter of 2004 and continue through the third quarter of 2004.

Behlman received an order for approximately \$200,000 for power supplies used in oil and gas exploration. Since 1995, Behlman has delivered over 1000 units for this application and continues to work closely with several major companies in the oil service industry for the design of new power supplies that will be used on future oil and gas exploration systems.

Behlman also received an order from a major northeast railroad system for a power supply used in a railroad signaling system. Behlman continues to achieve significant market penetration in this industry and its power supply has been approved as a source for future requirements. In addition, Behlman's power supply has been designed for a broad range of railroad signaling applications.

Finally, Behlman received an initial order for a frequency converter to be used by the U.S. Air Force, as part of a hanger upgrade program. Although this initial order is for only one hanger, Behlman has been approved as the source of supply for future requirements.

Dennis Sunshine, President and CEO of Orbit, commented, “Behlman's commercial division continues to see strong business activity, as evidenced by its bookings to date in 2004 more than doubling from the same time in 2003. Once again, we remain very encouraged by our business environment and expect our strong operating results to continue in 2004.”

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Its Behlman Electronics, Inc. subsidiary manufactures and sells high quality commercial power units, AC power sources, frequency converters, inverters, uninterruptible power supplies and associated analytical equipment. The Behlman custom division designs, manufactures and sells power units and electronic products for military and high-end industrial usage. For a more detailed discussion of the risks inherent in the

Company's business the reader is referred to the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2003.

This press release contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including the expected delivery dates of new contracts, future orders for its power supply that will be used on future oil and gas exploration systems, its power supply being approved as a source for future requirements in the railroad industry, its power supply being approved as a source of supply by the U.S. Air Force as part of a hanger upgrade program and the expectation that strong operating results will continue in 2004. These forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause the actual future results of the Company to be materially different from such forward looking statements. Factors that might result in such differences include, without limitation, the current economic climate and military conflicts, variable market conditions and changing needs of the defense sector and the Company's customers. The forward-looking statements contained in this press release speak only as of the date hereof. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in the Company's reports and registration statements filed with the Securities and Exchange Commission.
