Behlman introduces a versatile AC Power Source / Frequency Converter /Inverter designed for superior global performance.

CE Marked Model PF1352 delivers clean AC power with microprocessor control and vacuum fluorescent display.

Hauppauge, New York, April 23, 2014 – Behlman Electronics, Inc., known for its leadership in providing power products for military, industrial, and commercial applications, has developed a new AC Power Source / Frequency Converter / Inverter ideal for all these market segments. It delivers 1350 VA of clean, regulated AC power from a 3.5” high bench-top unit that easily converts to rack mount.

The Behlman Model PF1352 is microprocessor-controlled, and provides fully adjustable voltage and frequency, low output THD, and high efficiency, plus excellent line and load regulation. Its unique overload protection system folds back voltage to maintain rated current without distorting waveform output. It has settings and measurements for voltage, frequency, current, current limit, watts and power factor, plus fault indicators for over voltage, over current, over temperature, constant current and overload latch.

This unit can be controlled via front-panel pushbuttons, or remotely via its RS232 interface. Options include an IEEE-48 interface, extended frequency range of 45 to 1000 HZ, and an adapter for USB to serial port.

At only 3.5” H x 17” W x 22” D (8.9 cm x 43.2 cm x 55.9 cm) the Model PF1352 readily fits on any workbench. An optional rack mount kit is also available.

“Our Model PF1352 is one of the most versatile power sources we have ever designed,” said Behlman President, Ronald Storm. “Its small size, quiet operation, and high efficiency make it ideal for avionics tests, power conversion, and ATE testing. By meeting CE Certification standards, we have ensured that this frequency converter is an international product.”

More detail, specifications and a downloadable data sheet are immediately available at www.behlman.com/pf1352.htm.

Behlman Electronics, Inc. is a subsidiary of Orbit International Corp., and the basis of the Orbit Power Group. Behlman manufactures and sells high quality standard, modified

standard, custom and COTS power solutions, including AC power supplies, frequency converters, inverters, DC-DC, AC-DC, DC-AC, uninterruptible power supplies, and VPX/VME power supplies.

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. The Orbit Electronics Group includes Orbit Instrument, Tulip Development Laboratory, and Integrated Combat Systems.
